Parking Violations NYC Report - Conclusions

Most Common Violations

Parking excess time violation and showing no parking tag is down, meaning people prefer not to use the Muni Meter services. People would park on illegal time for street cleaning and in illegal spaces, even just keeping their car standing to avoid it. We need to see what was done right in 2016 to make people park legally again as there was a drop in all top 5 violation that year compared to the year before and after.

Violations by Borough

There are fewer parking violations over the weekend then during the week. There is also a slight drop midweek. This shows people use their car more on the week for work and related errands hence cause more violations. All boroughs follow the patter, but at different numbers, cause a larger spike for the more populated ones.

When we break it down to violation every 2 hours, we see that most violation are during the work hours, and all boroughs follow the same pattern with sharper spikes and drops to the more populated ones as well.

Colors

White is a dominant color, with black, blue, and gray about a third of it.

Recommendations

1. Most violations are done by NY citizens, making the focus clear on them.
2. Most violations are done by suburban vehicles, meaning private car owners.
3. Because Manhattan is the most populated suburb, most violations are done there. It's best to focus on parking in places illegal to parking or stop at or parking at legal stops without paying for the service.
4. There was a dip in 2016 compared to 2015, but a slow fix in 2017, but not quite as high as 2017. It shows that the locals adept to with stop using their vehicles while others have the fines as part of the costs of owning a vehicle.
